

The background of the entire page is a blue, textured surface with a repeating diamond-shaped pattern. Scattered across this surface are several technical rubber components: a green O-ring, a green cylindrical sleeve, a red O-ring, and a white O-ring. A large white semi-circular shape is overlaid on the center of the image, containing text and the company logo.

RUBBER PRODUCTS:
A STORY RENEWED
SINCE 1942

sapat

PRODUCTION OF TECHNICAL **RUBBER** ITEMS

Based in Turin since 1942, Sapat manufactures a wide range of rubber and silicone products and components, available both from catalogue and customer drawing, using certified materials.

Given the company's long history, the product range has been significantly expanded over the years to meet customer needs.

The products made by Sapat according to drawing follow customers' precise design specifications, ensuring high-quality performance thanks to the company's high level of specialisation and versatility.

FIELDS OF APPLICATION

The products and technical parts are used in various sectors including: automotive, earthmoving equipment, tractors, forklift trucks, pneumatics, oil hydraulics, electronics, food, filters, and even design.

QUALITY CERTIFICATION

The high-quality standards, combined with the customisation of products and flexibility in terms of produced quantities and manufacturing times, have enabled Sapat to count among their customers several major companies in the automotive sector across Italy, Europe, and South America.

- UNI EN ISO 9001:2015 certification with Accredia registration number 2023-A.
- The company is expected to obtain the IATF 16949 certification.

RAW MATERIALS

The products made by Sapat according to drawing follow customers' precise design specifications, ensuring high-quality performance thanks to the company's high level of specialisation and versatility.

The materials used - mainly NR, NBR, HNBR, SBR, CR, EPDM, FMK, VMQ - are sourced from certified companies specialized according to the product type.

The high-quality rubber components manufactured by Sapat provide maximum sealing, resistance, and durability for the customer.

Based in Turin since 1942. **Sapat** manufactures a wide range of rubber and silicone products and components, using certified materials according to the highest-quality standards and the intended use of the products.

The products are available both from the catalogue and customized according to Customer's drawing.
